REPORT

Website data audit

Provenance of restored round-2 values, 29 October 2026.

This first pass corrects legal interpretation and restores missing round-2 page metrics. No inference, new scoring rules or private data were used.

Legal interpretation

No final CUAD configuration exceeds the always-absent baseline of 15/30. The highest observed ContractNLI count is 18/30 for Qwen3 32B with thinking off. Cross-model statistical superiority is not established. Local external article drafts were not edited in this repository.

Restored round-2 page values

Calculated by the existing frozen aggregate function. All 80 attempts remain in each quality denominator; failed attempts score zero. Median latency uses completed attempts with metrics, matching the original aggregator. Means must not be relabelled as medians.

Hardware	Model	Method	Attempts	Failed	Median seconds	Numeric recall
laptop	Qwen2.5-VL 7B	baseline	80	4	13.44	74.4%
laptop	Qwen2.5-VL 7B	layoutmask	80	0	17.31	65.5%
laptop	Qwen3-VL 8B Instruct	baseline	80	1	15.45	82.5%
laptop	Qwen3-VL 8B Instruct	layoutmask	80	3	17.92	66.3%
desktop	Qwen3-VL 32B AWQ	baseline	80	1	15.85	87.2%
desktop	Qwen3-VL 32B AWQ	layoutmask	80	1	12.16	69.4%

Source hashes and run IDs: audit JSON. Reproduce with `python -X utf8 tools/audit_website_data.py`; use `--write` to rebuild. The importer refuses missing groups, duplicate cases or a material discrepancy with the published word scores.

Dashboard coverage

Counts below are configuration summaries, not independent documents or distinct models. They establish dashboard source coverage; they do not mean every possible experiment was run.

Hardware	Task	Evaluation set	Configurations
desktop	chart_qa	confirmation v1	3
desktop	chart_qa	development	23
desktop	chart_table	development	22
desktop	ocr_crop	development	5
desktop	page_text	confirmation v2	2
desktop	page_text	confirmation v3	5
desktop	page_text	development	2
desktop	table	confirmation v1	3
desktop	table	confirmation v3	5
desktop	table	development	22
laptop	chart_qa	development	8
laptop	chart_table	development	8
laptop	ocr_crop	development	2
laptop	page_text	confirmation v2	4
laptop	table	development	8

Remaining presentation work

The review notes remain the specification for the larger redesign: populated named comparisons, plain-language task explanations, hardware guidance, legal visuals, HTML reports and matching PDFs. This audit does not claim that redesign is complete. Historical report files remain unchanged; restored dashboard values have a separate provenance record.

Public benchmarks only. No private documents, labels or model responses.

Source and frozen protocols
